

# RESEARCH STUDY

## Overactive Bladder

Bladder urgency or leaks affecting your daily life?

You may be able to join a clinical research study for women with overactive bladder.

The study is looking at an investigational treatment for overactive bladder symptoms, that is office based, minimally invasive, and takes 7-10 minutes to administer.

You may qualify if you:

- Are a woman age 22 to 80
- Have had symptoms for at least 6 months
- Have an average of at least one urge leak per day
- Can attend study visits
- Can complete simple study diaries and questionnaires

Participants will receive financial compensation for their time.
